

# Astrea IT Services

2015

## What Is Cloud Computing?

- Cloud computing is the use of computing resources (hardware and software) that are delivered as a service over a network (typically the Internet).
- Cloud computing entrusts remote services with a user's data, software and computation.
- End users access cloud-based applications through a web browser or a light-weight desktop or mobile app while the business software and user's data are stored on servers at a remote location

## What Is Salesforce.com?

- It is known for its customer relationship management (CRM) product on Cloud, Salesforce has also expanded into the "social enterprise arena" through acquisitions.
- Salesforce.com is a software-as-a-service company, that is now also offering platform-as-a-service (force.com).
